

For Official Use Only

AFRICA SECTION COVERAGE SCHEDULE

This report lists the printed media which the Africa Section of the Foreign Broadcast Information Service maintains on scheduled coverage. It does not include reference materials which support but do not contribute directly to the production of publishable wordage.

The schedule groups listings by country of origin and sourceline. Multiple sourcelines head the listing for any publication to which two or more sourcelines apply, with the principal sourceline entered first.

Publications from any given city appear in alphabetical order of their masthead titles, definite articles included.

CONTENT OF THE COLUMNS

The listings show the DAYS OF COVERAGE by the use of initials of the days of the week, with certain exceptions. The word "daily" stands for coverage expected seven days a week. When the periodicity of a publication is less frequent than once a week, one of the following abbreviations appears in this column: 'yearly', '2x year', '3x year', 'quart', '5x year', 'alt mon', '8x year', '9x year', '10x yr', '11x yr', 'monthly', '16x yr', 'ev 3 wk', 'ev 20 d', '18x yr', '21x yr', '2x mon', 'fortnly', '3x mon', 'ev 10 d', '4x mon', '50x yr', '52x yr', '84x yr', '2x week', '144x yr', '3x week', or 'unknown'. The word "note" indicates a complex publication schedule or one which does not correspond with the coverage. An explanation appears in the notes. The abbreviation "irreg" denotes coverage on a random basis. When the coverage is backstop or conditional the DAYS OF COVERAGE are irregular.

Digraphs indicate the COMPONENT:

EF-Africa

The CLASS OF COVERAGE indicates the normal purpose of monitoring the publication. Class E coverage is monitored primarily for reports on economics or business. Class J is general coverage. Class L is monitored primarily to serve lateral recipients. Class S coverage is monitored primarily for reports on science or technology. Class Z is backstop coverage taken only when other coverage is missed. Class X is any which cannot be assigned to one of the preceding classes.

The MODE, shown by a trigraph, is the medium in which the coverage appears:

Africa Section Coverage Schedule

PUB -- a newspaper, magazine, journal, newsletter, pictorial, or handout

XXX -- other

The INDEX OF INPUT shows the average number of issues per week of regular coverage available to FBIS. The index value is "0.00" for all backstop coverage and for all coverage taken irregularly or conditionally.

The LAG expresses the average number of days between the nominal date of publication and the receipt of that publication at Headquarters.

The NOTES describe the nature of a publication, translate its title, indicate its editorial control, etc.
